

# Meet Emma

Meet Emma. She's the EHS Manager for a nationwide company, dedicated to keeping her team safe and her sites compliant. From first aid cabinets to AEDs, eye wash stations, and vehicle kits, Emma makes sure everything is stocked, compliant, and ready for emergencies.

But managing it manually in-house or relying on service contractors? Neither gave Emma the real-time insights she needed. With audits looming, the pressure was on.

## Then, Emma found Clever First Aid—and everything changed.

Clever's PLUG and PLAY system made first aid management effortless. Smart cabinets track incidents, stock levels, expiration dates, and compliance status—all synced directly to Emma's phone.

Running low on supplies? No problem. Clever's system reordered automatically. Fresh stock arrived without Emma lifting a finger.

Keep Compliant

Emma didn't stop there. She expanded into Clever's connected device ecosystem, adding monitored AEDs to guarantee readiness, alerting her when maintenance was required, smart eye wash stations that notified her immediately after use, and vehicle kits that informed her whenever they were opened.

With each device connecting automatically to the internet, the installation was effortless—no complicated setup was required. Emma said goodbye to service contractors and DIY headaches. With Clever First Aid, her safety management is seamless, smart, and stress-free.
